

Participatory Action Learning for Freshwater Aquaculture

Cash Prizes Awarded

The recently appointed SUFA Danida advisor Don Griffiths, handing over US\$ 225 to Mrs. Arlene Nietes-Satapornvanit from the Asian Institute of Technology. Arlene won one first prize and two highly commended prizes for her PAL submissions.

Mr. Phan Tien Chuong from Nghe An Extension Centre receiving his US\$ 50 cash prize from Dr. Nguyen Cong Dan (SUFA National Director), for his highly commended PAL session entitled "How to recognise good quality fish larvae."

Tran Thi Tuyet and Nguyen Hien Thi receiving their US\$ 50 prize for their highly commended PAL session on "Planning and budgeting for rice-fish cultivation".

In the last edition of Aquaculture News participatory action learning (PAL) session plans on freshwater aquaculture were sought from people worldwide conducting extension and training of farmers.

A judging panel consisting of SUFA (Support to Freshwater Aquaculture program in Vietnam, funded by Danida and the Government of Vietnam funded) and DSAP (Development of Sustainable Aquaculture Project in Bangladesh, funded by USAID and implemented by WorldFish) staff and the competition coordinator completed judging at the end of April 2004

Prize winning entries together with PAL sessions developed by SUFA will be included in a Participatory Action Learning manual for aquaculture which SUFA and DSAP will jointly publish in English, Vietnamese and Bengali.

Aquaculture News in Action

Dear Sir or Madam,

We are very pleased of receiving your publication on "Aquaculture News Number 30, January 2004" which we have received it on February 20, 2004. It is now on display in our resource centre and it is very useful for our TRC users.

The library of TRC (the Trainers' Resource Centre on Sustainable Agriculture and Rural Development), based in the JVC-Cambodia (Japan International Volunteer Centre) is the most organized library in Cambodia in systematically collecting books and documents on Sustainable Agriculture (SA), Rural Development (RD), Community Based Natural Resource Management (CBNRM) and Environment Conservation. TRC has a reference library with over 3,000 books, occasional publications, videos, maps and posters, which are classified and indexed. Since such books and documents lack in Cambodia, TRC has attracted 924 library users including students and NGO workers who contribute for poverty reduction and food security in Cambodia through promotion of sustainable agriculture, rural development, environment and CBNRM.

We are grateful to you for providing us your publication for a long time even though we do not have any publication or information to exchange or share with you and also we do not have enough fund to subscribe your publications.

We sincerely appreciate which you have kept our mailing address in your mailing list to distribute your publications.

Thank you for your kindness in cooperation & help and information sharing.

Sincerely Yours,
Ms. Nop Pouev
